Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

Claims 17 and 18 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 17 and 18 recite the limitation "the flexible strips" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 15 and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Lang.

Lang disclosed an apparatus comprising a flexible material (10) having low permeability to a lighter than air gas, the flexible material (10) defining a chamber (interior portion of the reference numeral 10); at least one structural member (16) coupled to the flexible material (10) such that when the chamber is filled with gas to a known level, the apparatus is substantially neutrally buoyant under ambient conditions.

Art Unit: 3711

The structural member (16) (welded joint) is typically an adhesive an/or heat welded joint. Accordingly, the adhesive material considers a separate structure from that of the flexible material.

A portion of the welded joint defines at least a portion of a shape of the chamber.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lang ('455) in view of Garcia.

Lang disclosed an apparatus comprising a flexible material (10) having low permeability to a lighter than air gas, the flexible material (10) defining a chamber (interior portion of the reference numeral 10); at least one structural member (16) coupled to the flexible material (10) such that when the chamber is filled with gas to a known level, the apparatus is substantially neutrally buoyant under ambient conditions. It is noted that Lang failed to disclose a valve to seal the chamber. Such valve for a balloon is very well known in the art as evidenced by valve (10) of Garcia. Therefore, it would have been obvious to one of ordinary skill in the art to modify the apparatus of Lang with the valve as taught by Garcia for the advantage of permitting the regulation of gas into the chamber.

Allowable Subject Matter

Art Unit: 3711

Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 6-14, and 19-24 are allowed.

Claims 17 and 18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
